Purpose of this document

- Understanding and learning about Deep learning concepts and terminologies
- Mostly for answering to the questions of why, how, when, where, what, which
- Will try to cover include business scenarios and outcomes using the deep learning part in artificial intelligence
- Mostly for conceptual understanding from my learnings and try to minimize the coding logics, will include references by links with this notations → [Ref]

Who can read this document?

- In general, People are all interested to learn deep learning concepts feel free to read and ask questions in any of the above mentioned emails;
- Specifically, Entrepreneurs, data story tellers, people leaders, business enthusiastic people, technology consultants, AI and ML engineers, Research Scientist, Data Scientist, Data driven decision makers.
